## **I. INTRODUCTION**

ASSOCIATION DE SOLIDARITE DES FEMMES RWANDAISES (ASOFERWA) is non-governmental organization (NGO) created in 1994 just after the Genocide. Its mission is to encourage the socio-economic rehabilitation of vulnerable groups and to promote the national reconciliation. ASOFERWA's target groups are: Women in general, Orphans and Youth, Widows, Old people without family support, Women with low income, Female Commercial Sex Workers and people living with the HIV and AIDS.

**HIV Prevention project** was designed and is being supported by Global Fund via Government of Rwanda/Ministry of Health-RBC/SPIU, to serve as an opportunity to reach general population and key population with a comprehensive package of HIV Prevention programs with aim of reducing new HIV infections.

ASOFERWA as one of the implementing partners of MoH/RBC under this project namely **HIV Prevention Program** operates in **Huye, Nyanza and Karongi** Districts, whereby the target group is Key Population known as Female Sex Workers "FSW", Men Having Sex with Men (MSM) and Transgender Groups. The main objective of this HIV prevention program is to contribute on the reduction of new HIV infections by sexual contact.

## **II. THE PROJECT OBJECTIVES :**

- ✎ Increase knowledge on KP 's rights, reduce stigma & discrimination among KPs, improve collaboration among stakeholders in the fight against HIV /AIDS and Tuberculosis and improve enabling environment and protection of KPs
- ✎ Increased knowledge of FSWs and MSM peer educators on HIV/AIDS & sexual health issues and Tuberculosis, and enhancing accurate data quality

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

- ✎ Identify actual size of FSWs, MSMs and transgender
- ✎ Increase services uptake among KPs, share knowledge on HIV/AIDS & sexual health issues and Tuberculosis to fellow peers, improve quality of referral system and data based advocacy,
- ✎ Increase community awareness on HIV/STI prevention, OBBI, FP and SRH and Increase awareness on the IDU, and improve health services provision to IDU

### III. DESCRIPTION OF THE PROJECT ACTIVITIES

1. **Conduct supervision of activities** carried out by NGOs its an occasion for field visits to the activities implementing areas and meet representatives of beneficiaries and other stakeholders to discuss envisaged activities among chosen groups such as Female Sex Workers (FSWs), MSM and Transgender and plan for quality of peer education and strengthen linkages for successful health services on benefit of target groups.
2. **Conduct mapping or tracing of key population** goes with to update selected hotspots and networks. The activity consists of mapping hotspots and networks for easy tracing key population groups such as FSWs, MSM and Transgender through their location whereby we meet representatives of target groups namely peer educators and discuss with health facilities workers on serving key population groups and referrals systems.
3. **Support MSM and Transgender Key informants and peer educators** in identification and enrollment of new group members ; due to the complicity of tracing and enroll MSM and Transgender groups,this activity consist of motivating key informants of MSM and transgender so that they can help in identification and enrollment of new groups members from their hotspots and networks.
4. **Conduct training of Peer educators for MSM and Transgenderers** on HIV and AIDS and sexual health issues;this activity consist of training selected peer educators from targeted

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

key population groups especially MSM and Transgender to represent and train their peers after being trained and getting skills on HIV and TB Prevention Package and about health services.

5. **Organize quarterly meeting with Peer educators of FSW and MSM/Trans** for collecting data on HIV and STI, referral for HIV testing, promotion of condom use and STIs screening. This activity consist of data collection and collaboration mechanisms and it brings together ASOFERWA's staff, Health facility workers and Peer Educators such as Representatives of Female Sex Workers, MSM and Transgender, as key actors in HIV and TB prevention program and discuss how FSWs,MSM and Transgender are benefiting Health Services, discuss data collection process and use, reporting tools and discuss collaboration mechanisms towards expected results.
6. **The quarterly coordination meeting which brings together different key stakeholders in HIV and TB Prevention program and representatives of beneficiaries** to mention FSWs,MSM and Transgender. Discusses the progress of the HIV Prevention program, the achievements under the program and discuss collaboration mechanisms and actions to be taken to reach expected results especially at district level from three districts of **Huye, Nyanza and Karongi**. This activity was pending referring to the last quarter and was conducted in May 2022 and is being reported and was considered during quarter four (Q4) of the year 2021-2022.
7. **Produce and air radio series drama** this activity consist of producing Drama series to be aired on Radio ; was also pending but was conducted at the end of April 2022 and is being reported during this quarter four (Q4) of the year 2021-2022.

#### **IV. SUMMARY OF ACCOMPLISHMENTS AS BY ACTIVITY**

1. **Supervision of activities as** carried out by NGOs done and was an occasion for field visits to the activities implementing areas and

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

meeting representatives of beneficiaries and other stakeholders. Envisaged activities were discussed among chosen groups such as Female Sex Workers (FSWs), MSM and Transgender and planned for quality peer education and strengthening linkages for successful health services delivery on benefit of target groups.

- 2. Mapping and tracing of key population** exercise was done to update selected hotspots and networks. Previous data have been updated through new mapping of hotspots and networks for easy tracing and serving key population groups such as FSWs, MSM and Transgender from their location. Representatives of target groups namely peer educators were met and discussed with health facilities workers on serving key population groups and how to reinforce referrals systems.
- 3. Supporting MSM and Transgender Key informants and peer educators** was done to **reinforce** the identification process and enrollment of new group members due to the complicity of tracing and enroll MSM and Transgender groups. The activity was done by motivating key informants of MSM and transgender with facilitation and transport fees so that they can play their role and help in identification and enrollment of new groups members from their hotspots and networks as was the target.
- 4. Training of Peer educators for MSM and Transgenders** on HIV and AIDS and sexual health issues was essential and was done. Under this activity selected peer educators from targeted key population and groups especially MSM and Transgender were trained to represent and train their peers after being trained. After getting skills on HIV and TB Prevention Package and about health services promised to play their role.
- 5. Quarterly meeting with Peer educators of FSW and MSM** for collecting data on HIV and STI, referral for HIV testing, promotion of

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

condom use and STI diagnosis was done **as planned.**The activity concerns data collection and collaboration mechanisms and brings together ASOFERWA's staff, Health facility workers and Peer Educators (Representatives of Female Sex Workers, MSM and Transgender) as key actors in HIV Prevention and TB program. This served as an occasion to discuss how FSWs, MSM and Transgender are benefiting Health Services, discussed data collected and collection process and use, reporting tools and discussed collaboration mechanisms towards expected results.

**6. Quarterly stakeholders coordination meeting** brings together different key stakeholders in HIV and TB Prevention program and representatives of beneficiaries like FSWs, MSM and Transgender. Served to discuss the progress of the HIV Prevention program, the achievements under the program and discussed collaboration mechanisms and actions to be taken to reach expected results. This meeting was done at each district level among three districts of **Huye, Nyanza and Karongi**. The activity was conducted twice on different dates this quarter due to the one which was pending from quarter three and all sessions were successfully done.

**7. Produce and air radio series drama :** The activity was conducted by organizing Radio talk-shows and was conducted in April and June 2022. Radio talk-shows were organized in collaboration with RC Huye Radio and participants to the radio talk-shows include ASOFERWA' staff, RBC staff and Radio staff. Dates of Radio talk-shows were scheduled and planned as follow: 22<sup>nd</sup> April 2022 and 20<sup>th</sup> June 2022. Those Radio talk-shows are supported by records on CDs as means of keeping records and for further use.

## **V. PROJECT ACTIVITIES AND RESULT/OUTPUTS:**

**1. Conduct supervision of activities** was an occasion for field visits to the activities implementing areas and meet representatives of

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

beneficiaries and other stakeholders to discuss envisaged activities among chosen groups such as Female Sex Workers (FSWs), MSM and Transgender and plan for quality of peer education and strengthen linkages for successful health services on benefit of target group

From left to right was an interactive Field visits with PEs and HFW in

### **SUPERVISION RESULTS :**

- ◆ Field visits are done accordingly and coverage zone under HIV and TB Prevention program was visited in Huye , Nyanza and Karongi Districts
- ◆ Health Facility Workers were met and linkage process and its results were discussed,
- ◆ Representatives of target groups (FSWs, MSM and Transgender) were met and collaboration mechanisms were discussed towards reaching fixed objectives.

This was done by ASOFERWA's staff with aim of having more information on coverage zone, about FSWs, MSM and Transgender by Hotspots, Sectors and Health Facility refereeing on data to be collected and identification results.

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

**THE SUPERVISION PLAN /SCHEDULE WAS AS BY THE TABLE BELOW :**

N <sup>o</sup>	DISTRICT NAME	CONCERNED SECTORS	DATES OF ACTION	CONCERNED HEALTH FACILITY
1	Huye	Huye Gishamvu Ngoma Tumba Mbazi Mukura	20- 21/04/2022 21- 23/04/2022	CUSP HC Huye HC Mbazi HC Rango HC Mbazi HC Rango HC
2	Nyanza	Busasamana Kigoma Rwabicuma Mukingo	21- 22/04/2022 25- 27/04/2022	Nyanza HC  Hanika HC
3	Karongi	Bwishyura Mubuga Rubengera Gitesi Gashari	22- 23/04/2022 27- 29/04/2022	Kibuye HC/Bwishyura HC Rubengera HC  Kirambo HC

2. **Conduct mapping or tracing of key population** to update selected hotspots and networks. The activity consists of mapping hotspots and networks for easy tracing key population groups such as FSWs, MSM and Transgender through their location whereby we meet representatives of target groups namely peer educators and discuss with health facilities workers on serving key population groups and referrals systems.

**THE MAPPING AND TRACING RESULTS :**

- ◆ Hotspots and Key population's networks are known and traced;

A Healthy People. A Wealthy Nation

- ◆ Key population's groups such as FSWs, MSM and Transgender are identified and will be reached by comprehensive HIV Prevention Program.

This was done by ASOFERWA's staff in closer collaboration with key informants from target groups and local leaders with aim of having more information on numbers of beneficiaries by type of group among FSWs, MSM and Transgender and Health Facilities to serve the groups under HIV and TB Prevention program.

#### THE MAPPING PLAN /SCHEDULE AND RESULTS AS BY THE TABLE BELOW :

Nº	DISTRICT NAME	DATES OF ACTION	COVERED ZONE BY SECTORS	# OF BENEFICIARIES BY SECTORS
1	Huye	16-17/05/2022	Huye Ngoma Tumba Mbazi Mukura Gishamvu	230 FSWs and 18MSM 1170 FSWs and 28MSM 580 FSWs and 13 MSM 139 FSWs and 8 MSM 120 FSWs 70 FSWs and 13 MSM
2	Nyanza	18-19/05/2022	Busasamana Rwabicuma Mukingo Kigoma	418 FSWs and 25 MSM 123 FSWs and 5 MSM 15 FSWs and 7 MSM 246 FSWs and 11MSM

### 3. **Support MSM and Transgender Key informants and peer educators in identification and enrollment of new group members ;**

due to the complicity of tracing and enroll MSM and Transgender groups, 30 Key informants from three districts of Huye ,Nyanza and Karongi were motivated and supported with communication and transport fees in order to help in identification and enrollment of new groups members among MSM and Transgender from their hotspots ,networks and from our coverage zone .The above mentioned figures of MSM including Transgender in previous paragraph are results of the contribution of key informants motivated.

### 4. **Conduct training of Peer educators for MSM and Transgenders** on HIV and AIDS and sexual health issues;this activity consist of training selected peer educators from targeted key population groups especially MSM and Transgender to represent and train their peers after being trained and getting skills on HIV and TB Prevention Package and about health services.

The aim of training of help peer educators to get and increase knowledge on HIV and TB Prevention among MSM and Transgender, and get to increased services uptake among KPs, through shared knowledge on HIV/AIDS & sexual health issues to their fellow peers as results.

Topics for the training were organized with aim of responding to the needed skills by Peer Educators of such groups in HIV/AIDS and TB prevention area and other related programs. The following are themes and topics developed and covered during this refresher training :

- Peer education techniques and roles of PEs towards serving their peers;

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

- Use, demonstration and distribution of condom and lubricants;
- Basic knowledge on HIV/AIDS prevention and STIs;
- The importance and use of HIV Health Testing and Counseling and VCT ;
- Basic knowledge on Sexual Reproductive Health;
- Combating Drugs abuse in the context of HIV contamination ;
- Sexual and Gender Based Violence (SGBV);
- The use of PEs reporting tools, and referral forms.

The training of peer educators held at district level, from each of the three districts such as **Huye, Nyanza and Karongi**; and each session accommodated 14 Peer Educators selected from MSM and Transgender Groups per hotspots and their location.

The table below gives more information on how the training was planned and organized:

Nº	DISTRICT NAME	DATES OF ACTION	COVERED ZONE BY SECTORS	# OF PEER EDUCATORS TRAINED	HEALTH FACILITIES SERVING MSM and TRANS.

5. **Organize quarterly meeting with Peer educators** of FSW and MSM for collecting data on HIV and STI, referral for HIV testing, promotion of condom use and STI diagnosis this activity consist on data collection and collaboration mechanisms and brings together ASOFERWA's staff, Health facility workers and Peer Educators (Representatives of Female Sex Workers, MSM and Transgender) as key actors in HIV Prevention and TB program, It's an occasion to discuss how FSWs,MSM and Transgender are benefiting Health Services, discuss data collection process and use, reporting tools and discuss collaboration mechanisms towards expected results.

Photo shows people met during data collection meeting with involvement

### THE MEETING'S AGENDA:

- Sharing data collection tools, data collection flow chart and mechanisms,
- Discussing on quality of collected data and updating identification of key population,
- Discuss on Peer education sessions and engagement of other stakeholders in program.

RWANDA  
BIOMEDICAL  
CENTER

A Healthy People. A Wealthy Nation

## THE MEETING RESULTS :

- ◆ 60 participants made by Representatives of targeted key population (FSWs, MSM and Transgender) and Health Care Providers per District from **Huye, Nyanza and Karongi** Districts were met and shared data collection tools and mechanisms, use of Data, available reporting tools and discussed quality of collected data.
- ◆ Strategies and collaboration mechanisms between Peer Educators and Healthcare Providers receiving and serving key population's groups such as FSWs, MSM and Transgender, IDU were discussed to maintain positive interventions and for results based management.
- ◆ Peer education sessions were discussed for a smooth and conducive environment and harmonization of referrals system.

The data collection meeting was held at District level from targeted health facilities in **Huye, Nyanza** and **Karongi** Districts. The table below gives more info on how the meeting was scheduled:

Nº	DISTRICT NAME	DATES OF ACTION	VENUES HEALTH FACILITIES	BY	CATEGORY OF PARTICIPANTS
1	Huye	24/05/2022	CUSP HC Huye HC		1. Peer educators of Key Population such as FSWs, MSM and Transgender 2. Health Facilities workers.

7. **Produce and air radio series drama, this** activity was conducted by organizing Radio talk-shows and was conducted in April and June 2022.

Radio talk-shows were organized in collaboration with RC Huye Radio and participants to the radio talkshows include ASOFERWA' staff, RBC staff and Radio staff. Dates of Radio talk-shows were scheduled and planned as follow: 22<sup>nd</sup> April 2022 and 20<sup>th</sup> June 2022. Those Radio talk-shows are supported by records on CDs as means of keeping records and for further use.

## VI. Challenges :

In general project Implementation process was not easy due to Covid-19 outbreak and its preventive measures to comply with, but with closer collaboration with local leaders and key community actors we were able to do and manage planned activities.

## VII. Budget execution

## **VIII. Conclusion.**

We are happy that all the activities that were planned for Q4 FY 21-22 HAVE been achieved, despite time constraints and Covid-19 Outbreak with its preventive measures to comply with. Targeted groups and key actors including local leaders have been actively involved in the activities implementation process, and they promised their full involvement towards achieving defined goals and objectives.

## **IX. Recommendations and Responsible Institutions :**

1. More Key populations Medical Files are to be produced by RBC according to the new numbers of key populations as reported from identification results.
2. Health facilities workers especially focal persons are to be trained by RBC on key populations' friendly services and on how to use KP Medical file and on how to provide the unique Identification code (UIC) to key populations.
3. MoH/RBC has to consider costs related to covid-19 Testing Costs and prevention measures for smooth implementation process.
